Utah Conservation Corps COVID-19 Protocol

The purpose of the UCC COVID-19 Protocol is to keep UCC AmeriCorps members, staff, partners, and the public safe and healthy.

This UCC COVID-19 Protocol is in addition to the guidance issued by the Center for Disease Control (https://www.cdc.gov/coronavirus/2019-ncov/index.html) and Utah State University (https://www.usu.edu/covid-19/). This protocol is specifically designed for UCC field crew operations. The UCC COVID-19 Protocol is a minimum level of protection for UCC field crews.

Additional restrictions may be enforced at the discretion of UCC Staff to provide a safe and healthy work environment for everyone. This document will be updated and/or revised as associated data for COVID-19 changes.

UCC takes the current COVID-19 health emergency very seriously. Compliance with UCC’s COVID-19 Protocol is mandatory. Failure to comply will result in termination of term of service.

Acknowledgements: UCC would like to gratefully acknowledge Northwest Youth Corps, Montana Conservation Corps, Conservation Legacy, Pacific Northwest Trails Association, and the Intergovernmental Internship Cooperative for sharing protocols and collaborating on best practices in a COVID-19 environment.

NOTE: UCC field operations have been deemed as essential by the Vice President of Student Affairs at Utah State University. This designation may be revoked at any time.

Decision Making Rubric for UCC Field Operations

*The decision-making rubric will be reviewed and operations determined within 2 weeks of scheduled field season start date.*

- Responsible party – UCC COVID-19 Task Force. Using the best predictive information available at the time under consideration; is it likely that restrictive civil orders will have been lifted at the national, and state level. If “yes” continue to next evaluative criteria. If “no”, consider the appropriate duration to suspend the start date.

- Responsible party – UCC COVID-19 Task Force. Do we have the ability to implement our COVID-19 Protocol within the time frame and locations under consideration? If “yes” continue to next evaluative criteria. If “no” consider the appropriate duration to suspend the start date.

- Responsible party – UCC Projects and Partnership Coordinator. Do we have enough trained staff to operate and support our crews? If “yes” continue to next evaluative criteria. If “no” consider the appropriate duration to suspend the start date, and/or reduce the number of crews to a level commensurate to our staffing.

- Responsible party – UCC AmeriCorps Coordinator. Do we have at least 50% qualified applicants at the time of consideration to be confident in fielding full crews at the proposed start date? If “yes” continue to next evaluative criteria. If “no” consider the appropriate duration to suspend the start date, and/or adjust program parameters to an acceptable level.

- Responsible party – UCC Projects and Partnership Coordinator. Do we have enough vehicles, equipment and supplies to operate the program or can we obtain (logistically and financially) by the time the program begins? If “yes” continue to next evaluative criteria. If “no” consider the appropriate duration to suspend the start date, and/or adjust program parameters to an acceptable level.

- Responsible party – UCC Director with approval from USU Vice President for Student Affairs & Risk Management. Does operating a crew, given the current socio-political climate and the climate that is likely to be present in 2 weeks, align with UCC and Utah State University’s values. If “yes” proceed to plan for this program. If “no” consider the appropriate duration to suspend the start date.
I. Definitions

For the purposes of this document and the UCC, the following definitions apply:

Family unit:
- The members with whom you create a Crew Contract with following the Minimal Contact Training Period (i.e. your crew for the season).

Social distancing:
- When possible, maintain at least six feet between all individuals outside your family unit.
- Wear a mask when in public and when it is difficult to maintain six feet between you and individuals outside your family unit.

Shelter in place:
- Sheltering in place means staying in your place of residence, UCC provided campsite, or project site, when possible. Members are encouraged to only leave their place of residence or the project site for work, necessary food shopping, and recreation. All CDC, state, local, and UCC field office regulations must be adhered to when leaving the shelter in place location for work, food shopping and recreation.
- Local regulations may vary based on field office location. UCC Field Staff for each field office location is responsible for communicating local regulations to members as they relate to travel, food shopping and recreation.
- Practice social distancing as outlined above.

Quarantine:
- Quarantine is used to keep someone who might have been exposed to COVID-19 away from others. Quarantine helps prevent spread of disease that can occur before a person knows they are sick or if they are infected with the virus without feeling symptoms.
- If possible, have others bring you supplies and drop them off outside your place of residence.
- If possible, do not leave your place of residence.

Isolation:
- Isolation keeps someone who is infected with the virus away from others, even in their home.
- If an individual tests positive for COVID-19, said individual will be isolated.
- Individual will have no in-person contact with anyone.
- Individual must have their own room and bathroom facilities. If needed, UCC will release funds to support member in isolation.

II. Conditions for New UCC Members to Serve

a. Minimal Contact Training Period
- Members will participate in the Minimal Contact Training Period. The Minimal Contact Training Period will be facilitated and monitored by UCC Staff.
- UCC Field Staff for each field office will notify incoming members with detailed information regarding the Minimal Contact Training Period.
- UCC will assist members with scheduling of COVID-19 testing prior to or at the start of the Minimal Contact Training Period.
- Members are expected to wear a mask at all times (except when eating or drinking) during the
Minimal Contact Training Period. This includes indoor and outdoor locations. Mask requirements during the Minimal Contact Training Period may be modified upon receipt of COVID-19 test results.

- Members are permitted to execute essential actions (determined by UCC Staff) to maintain personal wellness and facilitate a safe and successful Minimal Contact Training Period. Essential actions include the following (revocation or additions to these essential actions may occur at the discretion of UCC Staff): purchasing groceries, purchasing necessary outdoor gear, purchasing vehicle fuel.
- If a member’s term of service begins after the standard Minimal Contact Training Period, UCC Staff will manage safe integration of the member into existing field crews on a case-by-case basis.

b. Health and Travel Form

- Members must accurately and honestly complete a Health and Travel Form at the beginning of their term of service. The form will include:
  - A statement of all travel and locations for the four weeks prior to the member’s start date
  - History of any symptoms of COVID-19
- Contact with any person who has tested positive or has exhibited symptoms of COVID-19. The Health and Travel Form will be reviewed by UCC Staff and a USU Student Wellness representative. The intent of that review is twofold: (1) rule out any individual who may be more vulnerable to ill effects of COVID-19, since exposure to the virus during a program cannot be eliminated, and (2) rule out any individual whose potential exposure to COVID-19 may be at a higher level due to their health history, recent travel/activities and/or other risk factors. UCC reserves the right not to admit people who pose a communicable disease risk to others.
- UCC will direct potentially ill people not to come to UCC if they exhibit COVID-19 symptoms. While delayed inclusion is likely not an option, participation in UCC field seasons with a later start date may be possible.

c. Assumption of Risk and Protocol Agreement Form

- All new members must submit an Assumption of Risk and Protocol Agreement Form prior to the member’s start date.
  - New members will be informed of the potential risks associated with participating in UCC programs and informed about UCC’s COVID-19 protocol and the commitments necessary for participants to make (including engaging in self isolation outside of the programs dates, if necessary).

III. Conditions for all UCC Members to Serve

- All actively serving UCC members must submit an Assumption of Risk and Protocol Agreement Form.
- Logistics, short field seasons, and COVID-19 have made it very challenging for UCC Staff to honor requests for time-off. UCC Staff will do our best to accommodate time off requests, but we cannot guarantee time-off outside of regularly scheduled days off. Considerations by UCC Staff of time-off requests will be contingent on project schedules, travel restrictions, COVID-19 Protocols, and CDC, state, and local regulations that are in place at that time.
- Crews may be required to shelter in place or quarantine at their project site during scheduled days off. The UCC COVID-19 Task Force is responsible for determining shelter in place or quarantine status of members at their specific field office location. This status will vary based on field office location, project type, CDC, state, and local regulations.
- Crews will follow protocols for social distancing when in contact with other crews, project partners, or
the public.

- Members will always don a mask when indoors and when it is difficult to maintain 6 feet of social distancing outdoors.
- Members will report their temperature and any other signs or symptoms consistent with COVID-19 on a daily basis using a form provided by UCC Staff. Signs and symptoms consistent with COVID-19 should be reported to UCC Staff immediately.
- Members unwilling or unable to commit to the protocols or demonstrating uncooperative attitudes toward protocols and hygiene will not be allowed to join and/or remain in programs.

IV. Project Operations

*UCC Staff and Site Supervisors will, at a minimum, use CDC guidelines to determine if UCC members are clear to travel and serve. Members are required to adhere to all of the following guidance.*

a. Travel: Ensuring Crew Member and Public Safety

*Travel on Project Time*

- When traveling in the UCC vehicle (or any USU vehicle) with two or more people, all vehicle occupants must wear a mask. This is in accordance with [USU Guidance on Face Coverings and Masks](#).
- If necessary, UCC Staff will designate approved travel routes.
- If a stop is required during travel, members must [continue to wear mask when out of the vehicle](#), ensure proper social distancing, avoid touching surfaces and faces, and wash their hands frequently. Crew members cannot linger at gas stations and cannot stop at restaurants unless a drive-thru option is available.
- Every truck cab will be equipped with hand sanitizer and sanitizing wipes. Members must sanitize their hands every time they enter the cab.
- Crews will regularly disinfect hard surfaces. At a minimum, UCC will follow [CDC Guidance for Cleaning and Disinfection of Vehicles](#).
- Increase ventilation by opening windows or adjusting air conditioning. Keep windows open when possible to maintain maximum ventilation in the cabin area.

*When fueling a vehicle:*

- Disinfect the fuel card after use.
- Wash your hands or sanitize hands immediately after you fill the vehicle with gas.

*Travel off Project Time*

Members are strongly encouraged to consider practicing UCC protocols during travel (adapted for personal travel). Specifically:
o If a stop is required during travel, traveler should don a mask, ensure proper social distancing, avoid touching surfaces and faces, and wash their hands frequently. Travelers should not linger at gas stations and should not stop at restaurants unless a drive-thru option is available.

o Personal vehicle should be equipped with hand sanitizer and sanitizing wipes. Traveler should sanitize their hands every time they enter the cab.

o Members should fuel their vehicle in accordance with the “fueling a vehicle” guidance above.

o Members should also review USU’s "Travel During COVID-19" page before traveling.

o Members may be required to quarantine upon return from travel. UCC staff and members must follow USU’s “Quarantine Guidelines” to determine when to end quarantine.

b. Interactions with Project Partners and UCC Staff

- Crew members will limit interactions with project partners, when possible, and will follow UCC’s protocol for social distancing.

- UCC Staff will coordinate projects to the level of crew self-sufficiency. UCC Staff will minimize the amount of time on project sites with crews. When necessary, UCC Staff may be on the ground in lieu of agency partner to help crews safely and successfully execute project work. UCC Staff and members will follow UCC’s protocol for social distancing.

- Crew members and UCC Staff will wear a mask when indoors and when not alone in a room or enclosed space. This includes UCC offices and other storage facilities. See USU’s Face Coverings and Masks guidance.

- Crew members will not share vehicles with project partners, with the exception of emergencies.

c. Camp Cleanliness

- Crews must maintain hand washing stations (equipped with soap and hand sanitizer) in the camp kitchen, restroom facilities, and at the worksite.

- All individuals must sanitize kitchen surfaces before and after meal preparation.

- There will be no more than one person per personal sleeping tent.

- If large wall tents are used as kitchens, sides will be kept drawn up for air circulation and UV exposure as often as possible.

- Whenever possible, meal preparation will occur in open air and members not directly involved with food preparation, cooking or dishwashing should distance themselves from the kitchen area.
d. Signs and Symptoms of COVID-19

Members should be isolated, removed from the field and strongly encouraged to get tested if they have any of the following symptoms:

- Persistent cough
- Shortness of breath or difficulty breathing
- Fever, defined as: person feels warm to the touch, gives a history of feeling feverish, or has an actual measured temperature of 100.4°F [38° C] or higher
- Chills
- Unexplained muscle pain or body aches that are not consistent with those sustained from the general physical nature of project work
- Sore throat
- New loss of taste or smell
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Members testing positive for COVID-19 will be isolated.

e. Discontinuing Isolation

AmeriCorps members may discontinue isolation when the following health status is achieved (in accordance with CDC guidelines for isolation):

- At least 10 days have passed since symptoms first appeared or since date of positive test and at least 24 hours have passed since recovery defined as resolution of fever without the use of fever-reducing medications and other symptoms of COVID-19 are improving.
- Isolation may be ended early if two negative tests results in a row are received, from tests done at least 24 hours apart.
- Members who are isolated must report whether their temperature is above or below 100.4 degrees to UCC Staff on a daily basis. UCC Staff will track occurrences of temperature above 100.4 degrees and will be responsible for notifying the member regarding discontinuation of isolation.
- Members are strongly encouraged to obtain another test at the completion of their isolation period.

f. Discontinuing Quarantine

AmeriCorps members may discontinue quarantine by adhering to USU’s “Quarantine Guidelines”.

g. COVID-19 Monitoring and Considerations While on Hitch

- Members will monitor their temperature, and any other signs or symptoms consistent with COVID-19 on a daily basis. UCC Staff must be notified immediately if fever and/or other symptoms consistent with COVID-19 present while on hitch. See Section h. COVID-19 Field Response and Evacuation Protocols.
- Any member showing symptoms of COVID-19 will wear a mask at all times, unless member is isolated in a tent or respiratory function is impaired by wearing the mask. The member should be isolated from the rest of the crew.
• Members showing symptoms of COVID-19 should be evacuated from front and backcountry projects and are strongly encouraged to be tested.
• See Section h.9 below for guidance regarding the rest of the crew.
• Leaders and members should spread calm and allow the group to express their emotions. If further mental health support is needed, efforts can be made to seek local and or teletherapy options which may exist. Member Assistance Program: 1-800-451-1834 or www.mylifeexpert.com
• If available, have the crew member use their health insurance or Intermountain Healthcare’s tele-medicine line or online chat feature (https://intermountainhealthcare.org/) to complete an assessment over the phone or online.
• A satellite communication device with texting technology will be assigned to every backcountry crew to allow communication with UCC Staff when outside of service.
• Upon return to service, the crew member should use their health insurance or Intermountain Healthcare’s tele-medicine line or online chat feature (https://intermountainhealthcare.org/) to complete an assessment over the phone or online.
• All non-COVID-19 injuries must be promptly reported to UCC Staff so as to direct injured individual(s) to appropriate level and location of care.

h. COVID-19 Field Response and Evacuation Protocols

If signs or symptoms consistent with COVID-19 arise, the crew leader or field boss (chain of command is determined by UCC Field Staff at each field office) must immediately notify UCC Staff. In most circumstances, UCC Staff will ask the field boss or crew leader to maintain consistent contact. Standard practices (refer to Field Manual, Feb. 2021, UCC Accidents and Emergencies section) for dealing with illness, evacuations, or fatalities in the field will be maintained, in addition to UCC’s COVID-19 Protocol.

When signs or symptoms consistent with COVID-19 arise, the following steps will be taken:

1. The patient suspected of having signs and symptoms of COVID-19 warrants immediate evacuation if they have:
   a. trouble breathing
   b. persistent pain or pressure in the chest
   c. new confusion
   d. inability to wake or stay awake
   e. bluish lips or face

2. Any member showing symptoms of COVID-19 will wear a face mask, unless member is isolated in a tent or respiratory function is impaired by wearing the mask. The member should be isolated from the rest of the crew.

3. Using a cell phone or satellite communication device, the field boss or crew leader must immediately notify UCC Staff listed in the Emergency Response Plan (ERP) regarding the situation and specific signs and/or symptoms.

4. UCC Staff, field boss, or crew leader should refer to the pre-established ERP when planning an evacuation or seeking definitive medical care.
   a. If needed, the UCC Staff may assist in execution of the evacuation or seeking of
definitive care.

b. If needed, UCC Staff may make changes to crew transportation on a case-by-case basis.

5. The following rules should be followed during and after transport to definitive care or field office location:

   a. Be calm, model calm.

   b. The number of people exposed to the symptomatic individual during transport shall be limited to as few people as possible. UCC Staff will determine appropriate means of mitigating risk. Any transportation of the symptomatic patient requires that appropriate disposable surgical mask and gloves are worn, and resources are available to sanitize the vehicle (COVID-19 Evacuation Kits).

   c. Follow all directions provided by UCC Staff. These directions may include (but are not limited to) recommendations about direct care of the affected member, keeping the crew isolated, and a plan of action.

   d. In the event that a third-party will be aiding in the transport, follow the specific directions given from UCC Staff. UCC will assist with or coordinate plan for evacuation. In the event that a medical evacuation is required, air medical support will make the decision whether to extract the patient via air or not. In fire season, air resources are typically scarce.

   e. Crew will regularly monitor and document patient’s vital signs and symptoms using a SOAP (subjective, objective, assessment, and plan) note.

6. UCC Field Staff will report the information gathered from the field boss or crew leader to UCC COVID-19 Task Force. The UCC COVID-19 Task Force, in conjunction with UCC Field Staff, will refer to the “Follow Up” section of the Field Manual, Feb. 2021, UCC Accidents and Emergencies during and after the emergency.

7. UCC Field Staff and a member of the UCC COVID-19 Task Force will make a determination regarding the project and crew responsibilities during and following the response and evacuation.

   a. All crew members remaining in the field will be closely monitored for symptoms. If a second member displays symptoms, all members will be removed from the field. At no time will crew members be without a vehicle at the project site.

8. Symptomatic members must quarantine.

   a. All members evacuated with COVID-19-like symptoms are encouraged to be tested for COVID-19.

   b. If quarantining in their own home is possible, they should do so.

   c. If they are not able to quarantine in their own home, UCC Staff will assist them in finding a location.

   d. If a crew member is evacuated from a project and quarantined to a tent or a home, an assigned crew leader or UCC Staff member should have at least a daily check-in with the member. The person conducting the check-in should maintain social distancing and comply with other guidelines as outlined by the CDC including wearing a mask and gloves. See ‘Discontinuing Quarantine section above.

9. Since the rest of the symptomatic member’s crew has potentially been exposed, they will remain physically separated from other members, staff, partners, and the public. Options include:

   a. Evacuation from the field if symptomatic member is positive.
i. Members may evacuate to their own homes if they are able to quarantine themselves in those places.

ii. If participants are not able to quarantine themselves in their own homes, UCC Staff will assist them in finding a location.

iii. Members are strongly encouraged to be tested after day 7 of quarantine.

b. Members may remain in the field if the following are all true:

i. The crew has enough resources to remain self-sufficient in the field.

ii. Communications between UCC Staff and members are reliable.

iii. No additional members develop signs or symptoms of COVID-19.

iv. Approval is granted by a member of the UCC COVID-19 Task Force.

i. Medical Treatment

If UCC members or staff are involved in an incident which requires definitive medical treatment, they will likely be treated at a facility where the likelihood of exposure to COVID-19 is more possible. In this event:

- Members will immediately notify UCC Field Staff regarding the incident.
- UCC Field Staff or leader and the patient will be the only ones to interact with medical staff within the medical facility.
- The person supporting the patient should minimize their time in the facility.
- Once discharged from medical facility, both UCC Staff and patient should wash their hands and change clothes.

- If a member needs to seek definitive medical care for non-COVID related medical treatment, the member may return to the field after receiving definitive medical care.

j. End of Term Protocol

These health protocols are to be followed regardless of the health of the crew, in an effort to mitigate any risks associated with participants unknowingly transmitting COVID-19 back into their home communities.

- Members are strongly encouraged to maintain a shelter in place status (or quarantine, if reasonable) on and off project time for the last 14 days of service with UCC. Great attention will be paid to limiting/eliminating field visits from the outside population.
V. Appendices

Appendix A Face Mask Information

Links to helpful information and science about wearing masks:

*(The following section is from PNTA Field Safety Protocols Manual)*

**FACEMASKS - INSTRUCTIONS AND GUIDELINES**

**When used correctly and properly cared for, facemasks:**
- May reduce the spread of pathogens to others by containing your own respiratory and oral droplets and aerosols.
- Should be worn even if you feel well — you may be pre-symptomatic, or asymptomatic.
- May prevent droplets and aerosols from coming into contact with your nasal and oral membranes.
- May help prevent you from unconsciously transferring pathogens from your hands to your face, nose and mouth.

**To Put on and Adjust a Facemask:**
- First, clean and sanitize your hands.
- Cover mouth and nose, making sure there are no gaps; masks should extend under the chin.
- The final step is to sanitize your hands again.

**To Remove a Facemask:**
- Handle it by the straps/ties, only.
- Using both hands, pull the mask up and away from your face.
- Do not touch the front/exterior surface of the mask.
- If soiled, dispose of the mask into a sealed trash or laundrybag.
- Clean and sanitize your hands.

**Additional Use Guideline**
- Never apply a facemask to a first-aid patient who is struggling to breathe.
- Do not touch the interior surface of the mask (which contacts your face) and do not allow other surfaces (even the exterior surface of the mask) to make contact with the interior surface if you intend to extend use.
• Avoid touching the mask while using it; if you do, clean and sanitize your hands.
• Do not wear a facemask below your nose (with your nose uncovered).
• Do not “store” a facemask below your chin between uses.
• Do not attempt to wear a facemask while eating or drinking (by pulling the mask aside in between bites/sips).
• Replace a mask if:
  o It is damaged or deformed, or otherwise no longer stays in place and seals over the nose and mouth.
  o You touch or otherwise contaminate the interior surface with bodily fluids.
  o It becomes damp, dirty, and/or difficult to breathe through.

Appendix B Disposable Gloves

1) To remove disposable gloves:
   a) Grasp the outside of one glove at the wrist. Do not touch your bareskin.
   b) Peel the glove away from your body, pulling it inside out.
   c) Hold the glove you just removed in your gloved hand.
   d) Peel off the second glove by putting your fingers inside the glove at the top of your wrist.
   e) Turn the second glove inside out while pulling it away from your body, leaving the first glove inside the second.
   f) Dispose of the gloves safely in a Ziploc bag. Do not reuse the gloves.

2) Clean (wash) and sanitize your hands.

Appendix C COVID-19 Kits

COVID-kit items will be in a separate sealed bag and should only be used in case a patient needs to be assessed or treated for a suspected infection.

COVID-19 First-aid Kit
Each crew will be equipped with a supplemental COVID-19 first-aid kit for attending to suspected cases of COVID-19 infection.

❑ (1) 1 bottle hand sanitizer
❑ (2) Cloth/surgical facemasks (to be worn by patient and first-aid provider)
❑ (1) Face shield or clear safety glasses (or goggles) for first-aid provider
❑ (4) Pairs nitrile gloves
❑ SOAP Note and pen/pencil (for recording and tracking patient’s symptoms)
❑ (1) Thermometer
❑ (1) Extra Batteries (for thermometer and pulse oximeter)
❑ (4) Alcohol swabs
❑ (1) Pack of Tylenol/ Acetaminophen
❑ (1) Pulse Oximeter
COVID-19 Evacuation Kit

Each UCC vehicle will be equipped with a COVID-19 Evacuation Kit. These items will be in a separate sealed bag and should only be used in case a patient with a suspected infection is being evacuated.

- 2 Large (30–50 gal) trash bags (for containing belongings of patient and first-aid provider)
- 1 bottle hand sanitizer
- 2 Cloth/surgical facemask (to be worn by patient and driver)
- 1 Face shield or clear safety glasses (or goggles)
- 4 Pairs nitrile gloves
